

Free Length Tile Format

A free length format is only available in our natural stones.

Free lengths have a fixed width (of either 400mm, 500mm or 600mm) and varying lengths ranging anywhere from 500mm up to a maximum of 1000mm.

Free length formats are laid as a random brick bond. You can expect a minimum of 3 different lengths in an order. A free length format is sold to the nearest m².
